

AMBAR UBALE

+91 9579377966 | ambarubale3333@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

Full-Stack Software Engineer with hands-on experience building production-grade web applications, AI-integrated platforms, and real-time systems using React, TypeScript, and Node.js. Skilled across the full development lifecycle—from responsive frontends to scalable backend APIs and Gen AI integrations. Focused on delivering high-performance, reliable, and clean-code architectures.

EDUCATION

Anuradha Engineering College — B.E. in Information Technology (CGPA: 7.8) Nov 2022 – Jul 2025
Yashwantrao Chavan Institute of Polytechnic — Diploma in Computer Technology (75%) Jul 2020 – Jul 2022

EXPERIENCE

Jarurat Care Foundation Nov 2025 – Mar 2026
Full-Stack Developer Intern Remote (Mumbai, Maharashtra)

- Developed a full-stack Nurse Management System (MERN, Firebase) to manage **100+ staff records** with live data synchronization, improving accessibility.
- Optimized a Java/Spring Boot WhatsApp bot, cutting manual response effort by **40%** and streamlining internal workflows.
- Partnered with a **5-member engineering team** to ship robust, production-ready applications, maintaining high code quality and on-time delivery.
- Redesigned the organization's website, enhancing UI/UX and cutting page load time by **30%**; integrated REST APIs to strengthen system responsiveness.

PROJECTS

AgenticAI Studio | React, TypeScript, Node.js, Express, MongoDB, Deno, LLM APIs [Demo](#) | [Code](#)

- Engineered a scalable **multi-agent AI coding platform** (Planner, Coder, Debugger) that automates end-to-end code generation, execution, and debugging, significantly reducing manual developer effort.
- Built a low-latency SSE streaming pipeline (**<2s response time**) enabling instant code generation and live preview within a fully browser-based IDE environment.
- Incorporated persistent **agent memory, version control**, and a hybrid execution engine to strengthen developer productivity, platform reliability, and long-term scalability.

HMS - Hospital Management System | React 19, TypeScript, Node.js, Express, Drizzle ORM, Socket.IO [Demo](#) | [Code](#)

- Delivered a full-stack, multi-role HMS (Admin, Doctor, Receptionist, Patient) covering appointment scheduling, OPD queue management, billing with auto-invoicing, and prescription workflows across **15+ REST API modules**, streamlining daily hospital operations.
- Implemented live notifications via Socket.IO for instant status and queue updates, and integrated Supabase PostgreSQL with Drizzle ORM across **10 relational tables** for type-safe, high-performance queries.
- Established secure JWT/bcrypt authentication with role-based access control (RBAC) and a TanStack Query API client featuring **51 auto-typed hooks**, deployed on Vercel and Render for production-grade reliability.

FutureCart E-Commerce Platform | React, TypeScript, Supabase [Demo](#) | [Code](#)

- Created a scalable, full-featured e-commerce platform supporting **50+ products** with advanced filtering, cart, wishlist, and secure checkout functionality.
- Enabled live inventory updates through Supabase Realtime, reducing admin update delays by **60%** and improving overall data accuracy.
- Designed a **multi-role architecture** (Admin, Seller, User) with integrated chatbot support, increasing user engagement and improving customer support efficiency.

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, Java, Python (Basics), C, HTML5/CSS3
- Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Spring Boot, Tailwind CSS
- Generative AI:** LLMs, LangChain, Agentic AI Pipelines, Prompt Engineering
- Databases & Cloud:** MongoDB, Supabase, Firebase, PostgreSQL, Vercel
- Tools & Concepts:** Git, GitHub, Docker, REST APIs, WebRTC, Zustand, TanStack Query, DSA, System Design & Architecture

CERTIFICATIONS

- Web Development — Internshala
- JavaScript (Basic) — HackerRank
